

Class News: Friday 13th June 2025

Oak Class: So far this term the Oak Class have enjoyed working on the topic 'Water'. During our STEM lessons we have conducted fair tests to establish how absorbent different materials are. We have made our own water filters using sand, pebble gravel and larger stones to attempt to clean dirty water.

During our Maths work we have been working on fractions, students have worked extremely well using a range of resources to understand the fractions of different shapes and quantities.

Once again, we have been busy outside in our horticulture area tending to the flowers and vegetables that we have been successfully growing.

Some of the Oak Class students have been having a wonderful time attending creative music sessions, exploring both sound and instruments.

We had a fantastic day during our recent Career's Day with all of the class getting involved in all of the workshops on offer. So far it has been a fun packed busy term.

Hazel Class: Hazel class have had a very busy term. In Maths, we have been dividing by 2 and learning about arrays and how to use them when grouping numbers together.

We had a special guest, Bella come into the class, and she picked students to answer an equation.

In forest school, we have been doing about pond life and the students collected sticks and leaves and used them to arrange a frame which went around pictures that they drew with chalk.

Animals UK came into school and the students had an opportunity to meet the animals and hold them. The students really enjoy this. Well done Hazel class for a great term.
