

CLASS NEWS

PEARS CLASS

Pears have had a fantastic start to the summer term! We have started our new topic, Holidays, and the children have thoroughly enjoyed exploring different holiday destinations and thinking about the exciting activities they could do while away.

In Maths, the children have been busy packing and unpacking -their "holiday bags," using a list of items they might need. This has been a fun and practical way to develop their counting and sorting skills.

In English, we have been exploring holiday brochures as part of our non-fiction writing. The children have loved discovering how information is presented and have chosen some wonderfully exotic places they would like to visit.

It's been a wonderful start, and we are looking forward to all the learning and activities this term!

CLASS NEWS

ROWAN CLASS

It's been an exciting and engaging start to the term in Rowan class, with lots of hands-on learning taking place across the curriculum. In our creative learning, we explored the beautiful tradition of Rangoli art, using coloured rice to create our own vibrant patterns and designs while learning about its cultural significance. In maths, we focused on capacity and volume, developing our understanding of measuring and comparing amounts in millilitres (ml) through a range of practical activities and investigations. We explored different types of holidays in STEM and discussed what we might need to pack for each one, thinking carefully about the equipment required and explaining our reasons for choosing particular items. This encouraged problem-solving, critical thinking and real-world decision-making skills. We are incredibly proud of the enthusiasm, creativity and curiosity shown by Rowan class this term and cannot wait to share the exciting things to come! 😊
